

AFTER ROBERTS' SEAT

Aspirants For His Shoes Are Plentiful.

MANY WANT THE POSITION

J. T. HAMMOND PUSHED BY THE REPUBLICANS.

Prospect That Utah's Congressman

Will Be Expelled Causes a Considerable Amount of Gossip as to Who Should Be Chosen to Succeed Him.

Should B. H. Roberts be deprived of his seat in congress, which now seems not unlikely, there will be a contest for the vacant seat that will be decidedly interesting. Already Secretary of State James T. Hammond has many pegs set, and the impression is widespread that if he can get the consent of Colonel Lamm, he will have no difficulty in securing the Republican nomination.

George Sutherland has many Republican friends who have been grooming him for congress for some years past, and they will make a hard pull for his nomination. Lindsay J. Rogers, the member of the Republican national committee, is being pushed in certain quarters. He has the advantage of having been a pioneer gold standard advocate and is a shrewd politician. Lewis C. Elchinger is also mentioned by some who fell under obligations to him for work done in the last campaign. He also was in advance of his party on the gold standard proposition.

The interest in this matter is by no means confined to Republicans. Already many Democrats are discussing as to who shall be Mr. Roberts' successor. Judge King's name comes naturally into such discussion, and his strength both as a candidate and a congressman are freely admitted.

Charles S. Yarnall is also much discussed in this connection, and should he permit the use of his name he will have hosts of friends to back him. The same may be said with equal force of Hon. C. C. Richards of Ogden, a good lawyer, a good speaker and a good organizer. Many kind words are heard of Judge H. P. Hendon, who is very close to the heart of the Utah Democratic party. He has never shirked a party duty. Fisher Harris' name comes in for its full share of the discussion and no man will have more ardent supporters should he conclude to enter the race.

While the above are the names that have come to the front most prominently so far, others will doubtless be heard from later on in the event that a special election becomes necessary. The battle, should it come, will be one of the most interesting in the history of the state.

TALKS OF COMMITTEE

Judge King Tells Who Roberts' Judges Are.

Judge W. H. King was asked last evening as to the personnel of the committee appointed by Speaker Henderson to investigate the case of B. H. Roberts. "Some of the men are well known to me," from the close association with them; others have entered the scene since my term expired and are comparatively unknown to me. Taylor, the chairman of the committee, represents McKinley's old district in Ohio. He is venomous in his dislikes, very bigoted and a narrow partisan.

"Practically much the same may be said of Landon of Maine, who is now in the Duluth district in Minnesota. He is the man who beat Towne for re-election. I consider him a very fair man. Fisher of West Virginia is a native and I know him well. Littlefield is the successor of Dingley from Maine and is a fair-minded man. McPherson of Iowa is a new man to me. De Armond of Missouri is one of the strong men of the house—a man of broad mind and much experience in national affairs. Lamm of Texas and Meyers of Indiana are old district men and will be influenced largely by a sense of right."

The first six named in the above list are Republicans; the other three are Democrats. It is worthy of note that in making up this committee Speaker Henderson ignored the thirty congressmen who voted in favor of giving Roberts his seat, tending the investigation of the committee.

MEETING TODAY.

Woman's Democratic Club to Hold Session.

The Woman's Democratic club will hold a very important meeting this afternoon at the joint building. It is earnestly desired that a full attendance be present, as business of a vital nature will be transacted. Among other things, officers will be elected.

ASKS SEPARATE MAINTENANCE

FANNIE E. DICE FILES SUIT AGAINST V. E. DICE.

Later Is Proprietor of a Restaurant On Wheels That Stands On Commercial Street.

Fannie E. Dice filed a suit in the district court yesterday for separate maintenance against V. E. Dice, her husband, whom the complaint alleges goes by the name of Ed E. Johnson or V. E. Johnson.

The defendant, according to the complaint, owns and operates the Palace Dining Car, which is situated on Commercial street, and serves lunch-orders. To the best of the belief of the plaintiff, the defendant commands an income of not less than \$50 per week as the proceeds from his restaurant on wheels. He also has \$1,200 deposited in various banks in Salt Lake City.

As Dice is said to have practically deserted his wife and only allows her 50 cents per diem wherewith to clothe, feed and board herself, Mrs. Dice prays for judgment as the court may deem equitable, and that the defendant be restrained from selling his property and withdrawing his money from the banks, as the complaint states that he has avowed his intention of leaving the state of Utah.

Judge Hiles issued the restraining order as prayed for.

Pure Milk.

The Elkin Dairy company warrants and guarantees all milk sold by it to be absolutely unadulterated and pure, containing no preservatives of any kind. Samples for analysis may be taken free of charge from any of its wagons or milk depots.

Alaska Seal Jackets.

In stock and made to order. Sold with a guarantee that guarantees. McHess, the Furrier, Knutson.

Rent your rooms with a free ad. in next Sunday's Herald. See announcement on eighth page.

E. M. Keyser, dentist, fills teeth by the painless method. 162 Main street, Auerbach building.

INFERNAL MACHINES SHIP

COUNTY ATTORNEY'S OFFICE

The trial of John Smith, the man who is alleged to have sent infernal machines to Judge O. W. Powers and Warden Dow, will be begun before Judge Sorell this morning. At 10 o'clock yesterday afternoon Detective Sheets and Patrolman Sperry took the machines down to the county attorney's office.

"Here's Smith's infernal machines," cheerfully remarked Sperry, as he dumped his package and a large bucket full of plant powder in awesome proximity of the red-hot radiator, which was shrilly hissing defiance to all comers.

"What?" gasped Stenographer Rufus Cobb, while Deputy Van Vleet, who had been ejected, looked on in amazement. "Do be careful, Stenographer," said Sperry, "take it away." Sheets deposited his burden in the exact geometrical center

of the private office and with the recklessness born of carrying his life in his hands and his hands in his hip pocket, drew a cigarette case.

At this threatening motion Cobb made a flank movement for the door, but as he found the door locked, he turned back and found the infernal machines intended to elevate Judge Powers and promote Warden Dow to the position of chief of police, and to turn down another life insurance agent.

After circumnavigating the pyramid of explosives with due solemnity several times, the officers picked up the packages tenderly and ultimately laid them away on ice in the sheriff's office to await their resurrection at the trial today.

The patient's imagination. Acting on this, they approached him one day, saying they had found the trouble and the remedy. Accordingly the leg was burnt with caustic from the ankle to the knee, and the burns healed up as rapidly as possible. The patient then felt himself getting better every day, and as soon as the skin was in its former condition, he walked away praising the fine work of the doctors.

"Now," concluded the story-teller, "that may be called unprofessional, but think how much good it did for that party. Of course, he didn't know yet what a terrible bluff we can win with caustic. If he did know I believe he'd come back for treatment."

Will Pay Regular Dividends.

Speaking of the order to resume the payment of dividends, Superintendent Chambers said there was no question but that the amount named would be coming regularly from month to month, as the mine as well as the treasury were both in condition to pay that sum for an indefinite period. The monster ore bins at the mine are choked with ore, and the chutes leading down from the stores on the levels now being mined and aside from the year 1900, the old Ontario will again be paying a much greater sum per month than 10 cents, even though it may not, in the time it gets back its former schedule of 50 cents a share.

Crown Point Damage Suit.

As is generally known, a \$1,000,000 damage suit has been filed against the Ontario by the Crown Point Mining company—a suit which will probably come to trial early in the year—1940. Chambers declared that that suit need not worry the stockholders in the least, for the company's treasury and mine are both in such condition that neither the Crown Point suit, nor any other suit which could be brought against it, would prevent the payment of such dividends as that just declared. Just at present the company is not marketing any ore, the suspension being due to a controversy with the American Smelting & Refining company over the sampling of its product, a matter which will likely be settled by the end of the week, but in case it is not, and the Ontario stays out of the market for some time to come—something not very likely to happen—dividends will vary slightly in the future, but the same, as the treasury now holds probably close to \$400,000.

The news of the company's decision to again pay dividends has caused a great rejoicing, for no other mine in the state has done as much as the Ontario in building up the great commonwealth.

Sheldon - Jackson College

ENLARGEMENT OF PLANS DECIDED UPON.

Trustees Went Over Ground Yesterday With Architect Ware and Staked Building Locations.

The Sheldon-Jackson college idea is finally taking definite form, and the active work of constructing the buildings will begin as early in the spring as the weather will permit. Architect Ware is now working on plans for the buildings. The plans have been carefully considered, and during the winter something finer and more elaborate will be gotten out.

The enlargement of the plans is made possible by the hearty responses that come from friends of the institution in the east. Yesterday four of the trustees of the college—H. G. McMillan, G. H. Fenton, Dr. McNeely and Dr. Maclean, together with Architect Ware—yesterday visited the beautiful site in the southeastern part of the state, and the plans have been carefully considered, and during the winter something finer and more elaborate will be gotten out.

CASH FROM ONTARIO

Famous Mine Is Again a Dividend Payer.

TEN CENTS PER SHARE

COMPANY HAS NEARLY \$400,000 IN TREASURY.

Could Send Out An Immense Amount

Of Ore and Dividends Will Now Be Paid Regularly—Next Dividend Payment Will Be Made On the 20th.

After a two years' withdrawal from the ranks of the dividend payers, the great Ontario mine of Park City—the mine that has already paid its stockholders the princely sum of \$13,567,500—has again stepped into line and on the 20th of this month 10 cents a share, or \$15,000, will be distributed among the shareholders as a sort of Christmas gift, a dispatch to that effect having been received by Superintendent Chambers from Secretary F. G. Drum, San Francisco, yesterday.

The dividend was ordered by the directors at a meeting held in New York on the 1st of the month, and from there communicated to Secretary Drum in San Francisco.

The last dividend paid by the company was in November, 1937, when 75 cents a share, or \$112,500, was paid as a consolation prize, for it was then that the management decided to cease production till the price of silver went up again.

Will Pay Regular Dividends.

Speaking of the order to resume the payment of dividends, Superintendent Chambers said there was no question but that the amount named would be coming regularly from month to month, as the mine as well as the treasury were both in condition to pay that sum for an indefinite period. The monster ore bins at the mine are choked with ore, and the chutes leading down from the stores on the levels now being mined and aside from the year 1900, the old Ontario will again be paying a much greater sum per month than 10 cents, even though it may not, in the time it gets back its former schedule of 50 cents a share.

Crown Point Damage Suit.

As is generally known, a \$1,000,000 damage suit has been filed against the Ontario by the Crown Point Mining company—a suit which will probably come to trial early in the year—1940. Chambers declared that that suit need not worry the stockholders in the least, for the company's treasury and mine are both in such condition that neither the Crown Point suit, nor any other suit which could be brought against it, would prevent the payment of such dividends as that just declared. Just at present the company is not marketing any ore, the suspension being due to a controversy with the American Smelting & Refining company over the sampling of its product, a matter which will likely be settled by the end of the week, but in case it is not, and the Ontario stays out of the market for some time to come—something not very likely to happen—dividends will vary slightly in the future, but the same, as the treasury now holds probably close to \$400,000.

The news of the company's decision to again pay dividends has caused a great rejoicing, for no other mine in the state has done as much as the Ontario in building up the great commonwealth.
